

## Section 1

### **Edit change for Coverage Code 11 (Legal Alien-Full Coverage)**

Prior to this migration, Coverage Code 11 was only allowed with a Resource Verification Indicator (RVI) equal to 1. With this migration, an 11 is also valid with RVI values 2, 3, and 4.

## Section 2

### **Revision of Attestation of Resources WMS edit 1544**

For purposes of accommodating future transactions effective in either the following OR second following month after a child turns 19 years of age, the cross-editing between age and RVI value, necessary to satisfy edit 1544 (**COVERAGE CODES 19-23 NOT ALLOWED WHEN RVI=9**) has been modified to edits against 18 years & 10 months of age rather than 19 years.

## Section 3

### **New Social Security Number (SSN) Validation Code of “X”**

A new SSN Code “X” (SSN SSA Validation/Deceased) will now be available on WMS Screen 2. This Code is produced as a result of the SSN Validation process and cannot be data entered.

The Social Security Administration will return the “X” when they validate the SSN and the individual is also on their files as Deceased. When Local District workers see the “X” they should investigate and take appropriate action.

The following Error Messages are impacted by this change:

0281-SS CODE 7, 8, 9 OR A THROUGH E, X IS INVALID WHEN CIN IS ABSENT

If SSN Code is 7, 8, 9, A-E, or X, the CIN must be present. (F,U)

0284-SS CODE 8, X NOT ALLOWED WHEN NO SSN VALIDATION

An SSN Code of 8 or X may not be entered. (F,E,U)
