

Section 1 – New Edit for Payment Type 91 – Expedited ATP

A new Edit has been developed for use with Payment Type 91 – Expedited ATP. Households that qualify for expedited service, and are determined eligible for SNAP benefits are issued an expedited SNAP payment for the month of application, or the month of application and the subsequent month if the household applies after the 15th of the month. This new edit will prevent expedited payment errors by limiting the payment period To Date to the last day of the issuance month for payments with a From Date prior to the 16th of the month. A Payment Type 91- Expedited ATP, authorized with a Pay Period From Date prior to the 16th of the month and a Payment Period To Date in the following month will receive Error # 1586.

1586 – PAY TO DATE MUST BE THE END OF THE SAME MONTH AS PAY FROM DATE

If Payment Type = 91 and the Payment From Date is less than the 16th of the month, the Payment “To Date” must be the last day of the month of the Payment From Date.

Section 2 – Change to Error # 0224

The Social Security Administration (SSA) has verified with the NYS Office of Temporary and Disability Services (NYS OTDA) that certain rules are applied to the issuance of Social Security Numbers (SSN's). In an effort to ensure that SSN's entered are as accurate as possible, error # 0224 has been modified to conform to SSA Numbering Protocols.

When an SSN is data entered that is inconsistent with the SSA numbering structure, error # 0224 will be displayed.

0224 – INVALID ENTRY – SSN DOES NOT CONFORM TO SSA NUMBERING STRUCTURE

If SS code is 1, 7, 8 or 9 or A-E then SS number must conform to the SSA numbering structure for a valid SSN (F, E, U).
